#### Savor a total solar eclipse with D.J.s and dancing

On Aug. 12, eclipse chasers can get their fill of totality along a path that swoops through western Iceland and northern Spain. In Iceland, parts of the far-western [Westfjords](#), [Snæfellsnes](#) and [Reykjanes](#) peninsulas will go dark for two minutes or more. To celebrate the occasion, the country will host the [four-day Iceland Eclipse festival](#) on Snæfellsnes, featuring D.J.s, dancing and even a few astronauts in attendance. Ticket holders can also [book limited-capacity excursions](#) to witness the eclipse at the photogenic [Vodulfoss waterfall](#), go to an acoustic concert inside a lava cave or party in tunnels beneath a glacier. Local tour companies are running [jeep tours](#), bus trips and [photography excursions](#), while luxury cruises like the Ritz-Carlton Yacht Collection's [Eyrima](#) and the [Celebrity Silhouette](#) will put passengers in prime positions offshore, far from light pollution. The next total solar eclipse in Iceland won't happen until 2196, making this a once-in-a-lifetime event.
